# Danylo Sokolov

Lviv Ukraine  
14/08/97

## PROFILE

Hello! My IT-way counts 4 years of experience in general. I design and develop usable, simple, and beautiful apps for web & mobile.

I have worked as a Front-end Developer but then slightly changed my specialization to UX/UI Designer.

There were projects in my portfolio, where I had a role as a front-end developer and at the same time as a UI/UX designer. However, working on beautiful design solutions and making intuitive, user-friendly interfaces have become more interesting for me. Also, having experience in the development field is a great advantage for the designer.

### Design skills

- Sketch/Adobe XD/Figma
- Adobe Photoshop/Illustrator
- Wireframing
- User research

### Additional skills

- HTML/CSS
- JavaScript
- Node.js
- Wordpress
